About Me I am a postdoctoral researcher in Department of Land, Air and Water Resources, University of California, Davis. My research interest is in computational hydrologic model, hydrologic data mining, and integrated Coupled Nature-Human System modeling.

Research Interests

Hydrological response under stress of climate and landuse change from watershed to continental scale.

Advance data mining and statistical downscaling modeling in hydrology.

Spatial heterogeneity and homogeneity in runoff, evaporation, subsurface fluxes and in their sensitivity to their controls (e.g. snow fall regime, aridity, reaction coefficients).

High-performance/parallel computing in hydrologic models.

Coupled Nature-Human watershed modeling.

Professional Preparation

Pennsylvania State University	Water Resource Engineering	Ph.D. 2017
	Computational Science (minor degree)	
University of Chinese Academy of Sciences	Remote Sensing	M.S. 2009
Lanzhou University (Lanzhou, China)	Geography Information System	B.S. 2005

Appointments

2017 - Present Postdoctoral Researcher University of California, Davis (Davis, CA)

Hydrologic modeling on water availability (groundwater and snowpack) in the Central Valley in California history and future.

SHUD Model. Integrated hydrological modeling, parallel computing, lake modeling, calibration. (<https://www.shud.xyz>)

R package (SHUDToolbox), for GIS data process, sensitivity and hydrologic analysis. (<https://github.com/SHUD-System/SHUDtoolbox>)

2012 - 2017 Research Assistant Pennsylvania State University (University Park, PA)

Development of Penn State Integrated Hydrologic Model (PIHM)

Development of Cellular Automation Landuse Change Model (CALUC) – Top-down Cellular landuse change model

Hydrologic analysis tool (R and Matlab) –Read, write, parameterize, analysis(time series, spatial and uncertainty analysis) and visualize (plot, 3D/3D and animation).

Hydrologic data process tools (R)–Automatically download data from national data server and convert the data in GRIB, HDF, NetCDF format to other Time-Series format.

Talks and Posters

2019.12, Quick and reproducible automated watershed modeling with the SHUD: Essential data, simulation, applications and visualization, AGU, San Francisco, California, USA

2018.12 Model simulated spatial distribution and the variation of ground water level in

Sacramento Watershed, California from 1985 to 2017, AGU, Washington, DC, USA

2018.04 Groundwater and Snow Storage Simulation with PIHM, California Water & Environmental Modeling Forum, Sacramento, California, USA

2017.12 Coupling Cellular Automata Land Use Change with Distributed Hydrologic models, AGU, New Orleans, Louisiana, USA

2015.12 Catchment hydrological change from soil degradation — A model study for assessing urbanization on the terrestrial water cycle AGU, San Francisco, California, USA

2014.12 Reconstructing the role of land use change on water yield at the Maya urban center Tikal, Guatemala [700-800 AD], AGU, San Francisco, California, USA

2014.10 PIHM and PIHMgis workshop. Global Lake Ecological Observatory Network (GLEON) 16, Orford, Quebec, Canada

2013.12 Center for Green Infrastructure and Stormwater Management: Urbanization-driven hydrological process change in Lancaster of Pennsylvania, AGU, San Francisco, California, USA

Research Projects

2019 Knowledge-Guided Machine Learning: A Framework to Accelerate Scientific Discovery

2018 Model Integration through Knowledge-Rich Data and Process Composition

2017 An Integrated Evaluation of the Simulated Hydroclimate System of the Continental US

2017 Advanced Statistical-Dynamical Downscaling Methods and Products for California Electrical System Climate Planning

2015 CNH-L: Linking Landuse Decision Making, Water Quality, and Lake Associations to Understand Human-Natural Feedbacks in Lake Catchments

2013 Land, Water, and Territory: A 3,000-Year Study of Niche Construction and Cultural Evolution in the Tikal National Park, Guatemala

2012 NSF Hydrologic and Water Quality Modeling for Green Infrastructure

2008 Simultaneous Remote Sensing and Ground-based Experiment in the Heihe River Basin: Scientific Objectives and Experiment Design

2008 Heihe Watershed Allied Telemetry Experimental Research (HiWATER)

2006 Land and Water Resources in Heihe River Basin Decision Support System for Sustainable Development Based on Scientific Models and Three-dimensional Gaming Experience

2006 GIS-based Hydrology and Water Resources Integrated Modeling Environment Research in Heihe River Basin

Skills

Programming: ○ C/C++ ○ R ○ Java ○ Python ○ Shell ○ Matlab ○ Fortran ○ Qt

Professional software: ○ SHUD/PIHM ○ ArcGIS/GRASS GIS/QGIS ○ SWAT ○ HYDRUS ○ HEC-RAS ○ PAWS/PRISM

Courses Prepared To Teach

Numerical methods in geosciences

Geographic Information System

Data Mining in R

Data structure and algorithm

Advance C/C++ programming
